- **Greek:** Satisfactory (Speak and Read)
- **Afrikaans:** Satisfactory (Speak, Read and Write)

### NATIONALITY

- Greek (EU Passport & EU Citizenship)
- South Africa (Passport & Citizenship)

### ABOUT ME

I am a software engineer with over two years of working experience, actively learning new coding languages to upskill and stay at the forefront of technological advancements. I possess a passion for continuous learning, unparalleled teamwork abilities, and a proven history of consistently delivering exceptional outcomes. I approach tasks with meticulous organisation and unwavering motivation, striving to achieve optimal results.

### WORK EXPERIENCE

#### Software Developer

Hooligan Development

April - July  
2024 - 2024

- As a Software Developer at Hooligan Development, I worked on the National Student Financial Aid Scheme (NSFAS) app, utilising Angular to develop a seamless and efficient web application. I was also involved in creating the new version of NSFAS, making it more modern and user-friendly for students in South Africa. Despite our team's innovative solutions and dedicated efforts, the company encountered significant financial challenges. As a result, I am now seeking new opportunities where I can apply my skills and contribute to impactful projects.

#### Front-End Developer & UX/UI Specialist

Bettabets

June - April  
2023 - 2024

- As the lead Frontend Developer and UX/UI Specialist at Bettabets, I've transformed the online casino to a whole new level, creating an eye-catching and intuitive user experience. Through the use of A/B testing, heatmaps, user recordings, and other data analytics, I've optimised functionality and engagement as well as leading a major increase in efficiency. My innovative approach has not only revamped the platform but also positioned Bettabets as a leader in online casino design. Showcasing my prowess in frontend development and UX/UI enhancement by leveraging my proficiency in HTML, CSS, and JavaScript.

#### Junior Software Engineer

Paycorp Payment Services

Jan - Jan  
2022 - 2023

- I took on an early role as a team-lead and managed various developers below me. In my role, I exhibited excellent communication skills, goal-setting, strategy-planning, and organisational skills. The tech stack utilised for our projects included Angular, C#, and SQL, complemented by the integration of code testing tools, software containers, and Azure services, and others. One significant project I worked on involved the development of a web application designed to streamline financial processes, facilitating the monitoring and payment of merchants with self-cashing ATMs. Additionally, I successfully contributed to smaller-scale projects across various departments within the company, showcasing versatility in my technical expertise and project management capabilities.
- I maintained frequent and meaningful interactions with the group Chief Information Officer and other esteemed senior leaders within the organisation. Additionally, I took on the responsibility of delivering regular presentations to these executives, and providing comprehensive project updates.

#### Freelance Developer

Nov - Present  
2021 - Present

- I worked as a website developer on a freelance basis. During my leisure time, I dedicated myself to freelance development projects. In this capacity, I collaborated with clients to define project requirements, identify target audiences, and troubleshoot any encountered issues. My goal was to deliver optimal website solutions tailored to the specific needs of the client base. My tech stack includes proficiency in HTML, CSS, and JavaScript, with the ability to adapt to clients' diverse needs, incorporating technologies such as React and other relevant tools.
